2. Hazard(s) Identification

Physical hazards

Oxidizing liquids

Category 2

Health hazards

Acute toxicity, oral

Category 5

Skin corrosion

Not classified.

Category 1

Serious eye damage

Category 1

Environmental hazards

OSHA defined hazards

None.

Label elements

Signal word

Danger.

Hazard statement

May intensify fire; oxidizer. May be harmful if swallowed.

Causes severe skin burns and eye damage.

Precautionary statement

Prevention

Keep away from heat. Keep/Store away from clothing/combustible materials. Take any precaution to avoid mixing with combustibles. Do not breathe dusts or mists. Wash hands and exposed skin thoroughly after handling. Wear protective gloves/protective

clothing/eye protection/face protection.

Response

In case of fire: Use dry sand, dry chemical or alcohol-resistant foam for extinction. Call a POISON CENTER/doctor/medical professional if you feel unwell. IF SWALLOWED: Rinse

mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off immediately all

contaminated clothing. Rinse skin with water/shower. Wash contaminated clothing before reuse. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Immediately call a poison center/doctor/medical professional. Specific treatment (see supplemental first aid section on this label) IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do so. Continue rinsing.

Store locked up. Storage

Disposal

Dispose of contents/container in accordance with local/regional/national/international

regulations.

Hazard(s) not otherwise

classified (HNOC)

None.

Supplemental information

None.

3. Composition/information on ingredients

Chemical name	CAS number	%
Hydrogen peroxide	7722-84-1	10-15
Other components below reportable levels		80-100

4. First-aid measures

Move to fresh air. Call a physician if symptoms develop or persist. Inhalation

Remove contaminated clothing immediately and wash skin with soap and warm water for at Skin contact

least 15 minutes. In case of eczema or other skin disorders: Seek medical attention and take

along these instructions.

Rinse with water for at least 15 minutes. Remove contact lenses if present and easy to do so. **Eve contact**

Immediately call a physician or transport to hospital.

Rinse mouth. Get medical attention if symptoms occur. Do not induce vomiting. Ingestion

Can cause serious eye damage. Can cause burning sensation in affected areas. Can cause Most important

dermatitis, rash. Hydrogen peroxide can temporarily turn the skin white with persistent symptoms/effects, acute and

contact.

delayed Provide general support measures and treat symptomatically. Keep victim under observation. Indication of immediate

Symptoms may be delayed. medical attention and special treatment needed

Ensure that medical personnel are aware of the material(s) involved, and take precautions to General information

protect themselves. Wash contaminated clothing before reuse. Use with caution.

5. Fire-fighting measures

Foam. Dry chemical powder. Carbon dioxide (CO₂). Dry sand. Suitable extinguishing media

Do not use water jet as an extinguisher, as this will spread the fire. Unsuitable extinguishing

media

During fire, gases hazardous to health may be formed. Specific hazards arising from

the chemical

Self-contained breathing apparatus and full protecting clothing must be worn in case of fire. Special protective equipment and precautions for

Move containers from fire area if you can do so without risk. Fire-fighting

Use standard firefighting procedures and consider the hazards of other involved materials. Specific methods

No unusual fire or explosion hazards noted. General fire hazards

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

equipment/instructions

firefighters

Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Keep out of low areas. Wear appropriate protective equipment and clothing during clean-up. Avoid inhalation of vapors or mists. Do not touch damaged containers or spilled materials unless wearing appropriate protective clothing. Ensure adequate ventilation, Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up This product is miscible in water.

Large spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers. Prevent entry into waterways, sewer, basements or confined areas. Following product recovery, flush area with water.

Small spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills to original container for re-use. For waste disposal, see section 13 of the

SDS

Environmental precautions Avoid release to the environment. Avoid discharge into areas not consistent with package

labeling.

7. Handling and storage

Precautions for safe handling Avoid breathing mist or vapor. Avoid contact with eyes, skin, and clothing. Avoid prolonged

exposure. Provide adequate ventilation. Wear appropriate personal protective equipment.

Observe good industrial hygiene practices.

Conditions for safe storage,

including any incompatibilities

Store in original tightly closed container. Store away from incompatible materials (see section 10 of the SDS).

8. Exposure controls/personal protection

Occupational exposure limits

US OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

ComponentsTypeValueHydrogen PeroxidePEL1 ppm

US ACGIH Threshold Limit Values

ComponentsTypeValueHydrogen PeroxideTWA1 ppm

Biological limit values

ACGIH Biological Exposure Indices

No data available.

Appropriate engineering

controls

Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels to an acceptable level. It is recommended that users of this product perform a risk assessment to determine the appropriate personal protective equipment.

Individual protection measures, such as personal protective equipment

Eye/face protection

Avoid contact with eyes. Wear safety glasses with side shields (or goggles).

Skin protection

Hand protection

Wear appropriate chemical resistant gloves

Other

Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.

Respiratory protection

In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards

Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations When using do not smoke or use chewing tobacco. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

Contaminated work clothing should not be allowed out of the workplace.

Oxy Bleach (CAS mixture)		
Aquatic		
Crustacea	Daphnia magna	EC ₅₀ = 22 mg/L estimated.
Fish	Fathead minnow	LD ₅₀ = 68 mg/L estimated.

^{*}Estimates for product may be based on additional component data not shown

Persistence and degradability

Hydrogen peroxide in the aquatic environment is subject to various reduction or oxidation processes and decomposes into water and oxygen. Hydrogen peroxide half-life in freshwater ranges from 8 hours to 20 days, in air from 10 to 20 hours, and in soils from minutes to hours depending upon microbiological activity and metal contamination.

Bioaccumulative potential

Expected to be low, will likely degrade before accumulation can occur.

Mobility in soil

Will likely be mobile in the environment but will degrade over time.

Other adverse effects

None.

13. Disposal considerations

Disposal instructions

Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.

Local disposal regulations

Dispose in accordance with all applicable regulations.

Hazardous waste code

The waste code should be assigned in discussion between the user, the producer and the

waste disposal company.

Waste from residues/unused

product

Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner. (see:

Disposal instructions).

Contaminated packaging

Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may contain product residue, follow label warnings even

after container is emptied.
